

FULL CREAM UHT MILK

PRODUCT SPECIFICATION – 250ml Prisma

Produced and packed in New Zealand

Product Description

Ultra Heat Treated (UHT) or long life milk contains all the nutritional goodness that you would expect from any high quality dairy product. UHT long life milk contains no additives or preservatives. Like ordinary milk, UHT long life milk is a rich source of essential daily nutrients including:

- Calcium: needed for strong healthy teeth and bones
- Phosphorus: A vital part of the body's cells
- Potassium: needed for nerve function, muscle control and blood pressure control
- Riboflavin: releases energy from food
- Vitamin A: for vision and maintaining the immune system
- Vitamin B12: for new cell formation and growth
- Magnesium: an important mineral in bone mineralisation and nerve impulses
- Carbohydrate: Lactose is the main carbohydrate in milk it is an important source of energy
- Protein: crucial for the formation, repair, and maintenance of body tissues
- Zinc: good for the immune system and healthy growth.

Packaging

Full Cream UHT Milk is available in a 250mL (single serve) Prisma format, packed 24 per carton.
